

Please enter any **TECHNICAL** questions or topics you would like to discuss at the Summit. Don't worry about what other states have entered, repeated items show a lot of interest!

Arkansas

1. Backend software infrastructure for clearinghouses
2. Searchability of data and different methods to meet different user preferences
3. Open Source Geocoder
4. Dissemination of LiDAR data
5. Technical collaboration within your agency, other partner agencies, and other states

Illinois

1. ArcGIS Server cluster setup. Speeds at 10.1 Vs. 10.2
 - a. site architecture - number of machines, cores, RAM, OS, VMs, etc...
2. Lidar software utilized for serving data

Iowa

1. See AK #1
2. ISO metadata implementation.

Kansas

1. Responsive web design

Missouri

1. Issues encountered with ArcGIS Server upgrades\ESRI support.
2. See Illinois 1.a.

Nebraska

1. FME scripts for comparing old and new data both by geometric features and by attributes
2. Streamline LiDAR derivatives for online map displays. How far do you go for density and file size before losing quality.

North Dakota

1. Utilization of AGO groups with other agencies' AGO sites
2. Optimizing use of software licenses, e.g., sharing of floating licenses

Oklahoma

- 1.

South Dakota

- 1.
